

Idler Roll Surface Treatments

Stork Cellramic offers a wide range of surface treatments with unique properties. Coatings are available in a wide range of surface textures (20 - 500 Ra).

Below are just a few examples of what we offer:

Release	P-08DH	Ceramic/DuPont [®] fluoropolymer materials plasma sprayed composite coating with excellent clean-ability and will greatly reduce ink transfer from substrate. - FDA Compliant
Release	P-52DH	Alloy/DuPont [®] fluoropolymer materials plasma sprayed composite coating, similar to P-08DH but with anti-static properties. - FDA Compliant
Release	P-52Z	Provides excellent release for applications involving hot-melts, adhesives, glues, and other sticky materials.
Release/ Traction	P-101	Provides traction and excellent release for applications involving hot melts, adhesives, glues, and other sticky materials.
Release/ Traction	P-102	Provides traction and excellent release for applications involving hot melts, adhesives, glues, and other sticky materials.
Traction	P-31	Durable coating provides traction and is available in a wide range of surface textures.
Low Coefficient Of Friction	P-08D	Extremely durable ceramic/DuPont [®] fluoropolymer materials coating with excellent scratch and abrasion resistance. - FDA Compliant
Thermal	P-26N	Space-age thermal barrier coating protects in high heat environments.

Stork Cellramic improves the quality of your industrial products and processes.

We can make your parts:

- **Wear Resistant**
- **Corrosion resistant**
- **Heat Resistant**
- **Higher or Lower in Traction**
- **Conductive or Non-Conductive**
- **Higher or Lower Coefficient of Friction**

These coatings only represent a small selection of the coatings we have available. Please contact us to discuss your unique situation. If one of our standard coatings will not resolve your issues, we can engineer a surface treatment specific to your application.

No problem is too **big** or too small!
